

The goal of the West Coast Collaborative is to leverage federal funds to strategically reduce emissions from the most polluting diesel sources in impacted communities. The Collaborative seeks to improve air quality and public health by targeting the highest polluting engines with the most cost effective control strategies.

DERA Tribal 2016: Heavy Duty Truck Replacement for Morongo Band of Mission Indians

The West Coast Collaborative (WCC) is pleased to announce the Morongo Band of Mission Indians' receipt of a United States Environmental Protection Agency (US EPA) Diesel Emissions Reduction Act (DERA) grant to replace two heavy duty vehicles. This project will be implemented using \$167,458 in DERA grant funding combined with \$167,458 in matching funds from the Morongo Band of Mission Indians.

What is the Project?

This project will replace one 1997 model year refuse hauler and one 1998 model year dump truck with new clean diesel vehicles.

Why is this project important?

Exposure to diesel exhaust has been associated with decreased lung function and can also exacerbate the symptoms of asthma, bronchitis and pneumonia. This project will reduce human exposure to diesel emissions as well as the negative health effects associated with exposure. The vehicles to be replaced under this project operate within the South Coast Air Basin, which faces significant air quality challenges and remains in non-attainment for ozone and particulate matter.

What are the Environmental Benefits?

Over the remaining lifetime of the two affected engines, these replacements are projected to reduce emissions of oxides of

nitrogen (NOx) by 0.4 tons, and fine particulate matter (PM2.5) by 0.02 tons. Additionally, the reduction of PM2.5 emissions will reduce black carbon (BC), which influences climate by directly absorbing light, reducing the reflectivity ("albedo") of snow and ice through deposition, and interacting with clouds.

Who are the Partners on this project?

The project will be administered by the Morongo Band of Mission Indians. The Morongo Band will administer the grant funds, and will be responsible for data monitoring and reporting for the project.

What is the Collaborative?

The WCC is an ambitious partnership between leaders from federal, state, local, and tribal government, the private sector, and environmental groups committed to reducing diesel emissions along the West Coast. Partners come from all over Western North America, including: Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, Washington, the Pacific Islands, Canada and Mexico. The WCC is part of the US EPA National Clean Diesel Campaign (www.epa.gov/cleandiesel).

How can I find out more information?

For more information on this project, please contact Francisco Dóñez at US EPA (donez.francisco@epa.gov or 213-244-1834). For more information on the WCC, please visit our website. www.westcoastcollaborative.org
